VOLUNTARY ANNOUNCEMENT

LAUNCH EVENT

REGARDING THE AI EDUCATIONAL ECOSYSTEM PLATFORM

This announcement is made by China Environmental Resources Group Limited (the “**Company**”, together with its subsidiaries, the “**Group**”) on a voluntary basis to update the shareholders (the “**Shareholders**”) and potential investors of the Company on the latest business development of the Group.

Reference is made to the announcement of the Company dated 15 April 2026 in relation to a memorandum of understanding regarding potential cooperation in AI education (the “**Announcement**”). Capitalised terms used below shall have the same meanings as those defined in the Announcement unless the context requires otherwise.

The board of directors (the “**Board**”) of the Company is pleased to announce that, on 20 May 2026, the Group successfully held its launch event to unveil an AI educational ecosystem platform (the “**AI Educational Ecosystem Platform**”). The event attracted more than 100 distinguished guests, including representatives from the government, educational authorities, youth activity centers, universities, schools and educational technology companies.

THE AI EDUCATIONAL ECOSYSTEM PLATFORM

The AI Educational Ecosystem Platform comprehensively addresses both extracurricular training institutions and in-school education, offering a complete AI-driven solution ranging from teaching research enhancement, teaching quality improvement, learning

enablement, evaluation upgrades, and teacher development to management efficiency improvement. It is recognised in the industry as a practical and fully functional digital intelligence operating system.

For extracurricular education, the AI Educational Ecosystem Platform features six core modules, including AI marketing, AI enrollment, AI teaching research, AI classes, AI home-school engagement and AI operations. These modules enable seamless operations from public domain customer acquisition to private domain conversion and from teaching preparation to post-class services.

For in-school education, the AI Educational Ecosystem Platform offers innovative tools like the intelligent classroom evaluation system (the “**Intelligent Classroom Evaluation System**”) and the intelligent learning enhancement system (the “**Intelligent Learning Enhancement System**”) to support classroom diagnosis, homework assessment, learning analytics and psychological counselling. The Intelligent Classroom Evaluation System is designed for primary and secondary schools, uses knowledge-to-action theory and multi-model analysis. With only a recording from a mobile device, teachers can access classroom indices, teaching strategy recommendations and 4C (Critical thinking, Communication, Collaboration and Creativity) competency assessments. In addition, the Intelligent Learning Enhancement System focuses on academic assessments and precision teaching, offering smart question generation, automated grading, learning diagnostics, and personalised instruction.

STRATEGIC COOPERATION WITH 360 DIGITAL SECURITY

Reference is made to the Announcement regarding the signing of the MOU with 360 Digital Security, a preminent internet and AI technology enterprise in the PRC. The MOU outlines plans for strategic cooperation to leverage the Company’s educational expertise and 360 Digital Security’s AI technologies, aiming to develop comprehensive “AI+ Youth Education” solutions and benchmark projects to drive innovation in youth education.

Building upon the successful launch of the AI Educational Ecosystem Platform, the Group is pleased to recognise its strategic cooperation with 360 Digital Security. This cooperation represents a strategic initiative for the Group to expand its presence in the growing “AI+ Youth Education” market. Leveraging the expertise of the Group’s management in educational scenarios, industry knowledge and operational capabilities, alongside its extensive national network of youth centers, primary and secondary schools, and education and training institutions, the Group seeks to integrate 360 Digital Security’s advanced AI technologies to deliver innovative, scalable solutions. This cooperation is expected to accelerate the adoption of AI-based tools, providing value to educational institutions while fostering the development of high-quality teaching and learning models. The Group aims to further strengthen its strategic cooperation with 360 Digital Security, focusing on driving innovation and fostering growth in the “AI+ Youth Education” sector. By leveraging their respective expertise, the Group and 360 Digital Security will continue to explore new avenues to enhance this cooperation.

Through this cooperation, the Group aims to position itself as a key contributor to the development of the AI Educational Ecosystem Platform for youth education. The implementation of benchmark demonstration projects will showcase practical AI applications integrated with advanced education models, driving the evolution of intelligent education. These efforts align with the Group's strategic vision to expand in this rapidly evolving sector and contribute to national education priorities.

By facilitating the development of replicable, technology-driven education solutions, the Group seeks to enhance its competitive position while generating sustainable value for its shareholders. This strategic cooperation underscores the Group's ability to capitalise on growth opportunities in the youth education sector through its cooperation with 360 Digital Security.

Based on the above, the Directors are of the view that the strategic cooperation with 360 Digital Security is in the interests of the Company and the Shareholders as a whole.

By order of the Board
China Environmental Resources Group Limited
Yeung Chi Hang
Chairman and Chief Executive Officer
